Profile

Recent graduate process engineer with a strong foundation in industrial process optimization, quality management, and continuous improvement. Proactive and analytical, with hands on experience in Lean Six Sigma methodologies within the semiconductor industry.

Professional Experience

STMicroelectronics Bouskoura – Final Year Internship (Lean Six Sigma)

March – Sept. 2026

- Participation in a project to reduce material waste (glue) on the Die Attach process.
- Analysis of material consumption and BOM alignment with production planning to minimize scrap and improve yield.
- Use of DMAIC methodology and FMEA tool for risk and root cause analysis.

Jbel Annour Brick Factory – Internship (Processes & Quality) — Mohammedia

July – Aug. 2025

- Analysis and optimization of the manufacturing process (critical parameters, flow, non-conformities).
- Digitalization of production monitoring via a web application integrated into the QHSE system.
- Contribution to continuous improvement and industrial traceability initiatives.

Les Huileries du Souss Belhassan – Internship (Industrial Processes) — Agadir

Apr. – May 2023

- Study and analysis of unit operations in a continuous production environment.
- Participation in updating the quality system and process risk analysis.
- Application of standardization, safety, and critical parameter control principles.

Projects

- AI powered platform for APQP documentation and management. **APQP/PPAP/Core Tools**.
- Digitalization of production processes via a web application integrated into the **QHSE** system.
- Development of an industrial maintenance management application.
- Implementation of automated process parameter monitoring within an **Industry 4.0** framework.

Education

State Engineering Degree – FST Settat, Hassan 1st University

Sep. 2023 – Sept. 2026

Major: Process Engineering.

University Degree in Bio-industry Engineering – Higher School of Technology, Agadir

2021 – 2023

Baccalaureate in Life and Earth Sciences – Al Maarifa High School, Taroudant

June 2021

Additional Information

Technical Skills: Industrial processes, quality management, continuous improvement (Lean Six Sigma, DMAIC, FMEA), performance analysis, risk management, OPL writing.

Tools & Software: Excel, MATLAB, Python, ASPEN Plus, DWSIM, ANSYS, COMSOL, n8n.

Languages: Arabic (native), French (fluent), English (fluent).

Certifications: Six Sigma Green Belt, IATF 16949, ISO 9001, ISO 14001, ISO 45001, Industrial Safety (MC CCP), Industry 4.0, Machine Learning.

Personal Qualities: Analytical mindset, adaptability, teamwork.

Extracurricular Activities: Treasurer of CTDE Club - FST Settat.
